EXATRONIC statement to RoHS and REACH

RoHS stands for Restriction of Hazardous Substances and impacts the entire electronics industry and many electrical products as well. All products supplied by Exatronic comply with the substance restrictions of the Restriction on Hazardous Substances Directive 2011/65/EU (RoHS II).

As a downstream user, and to the best of our knowledge, all components and raw materials used in our production process do not contain any hazardous substances above the limits designated in the original RoHS Directive or any of its amendments. Therefore, we certify that all components and all homogeneous subcomponents are in compliance with the directive 2011/65/EC of the European Parliament and of the council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS Directive), amended by Directive (EU) 2015/863.

According to supplier’s information we certify the non-use of:

- Lead (Pb)
- Mercury (Hg)
- Cadmium (Cd)
- Hexavalent Chromium (Cr VI)
- Polybrominated biphenyls (PBB)
- Polybrominated diphenyl ethers (PBDE)
- Dibutyl phthalate (DBP)
- Benzyl butyl phthalate (BBP)
- Bis(2-ethylhexyl)phthalate (DEHP)
- Disobutyl Phthalate (DIBP)

REACH stands for Registration, Evaluation, Authorization and Restriction of Chemicals

Even though Exatronic is not an EN ISO 14001 certified company, we believe that strict compliance with the law is a powerful means of enforcing the pathway to a heathier, more sustainable and human world.

Exatronic as a manufacturer of electronic equipment is in view of the REACH Regulation (EU) 1907/2006 a downstream user. Obligations with respect to the manufacture and distribution of chemicals and their pre-registration and registration (ECHA – European Chemicals Agency) do not apply. Our products are assembled electronic solutions and therefore not defined as substances or preparations. Furthermore, no substances are released during normal and foreseeable conditions of use. As such, Exatronic is neither subject to compulsory registration nor is required to prepare health and safety documentation, in this respect.

In order to guarantee that our customers continually receive reliable and safe products, we ensure that our suppliers fulfil all the requirements in respect of chemical substances and materials and that no substances from the ‘Candidate List of Substances of Very High Concern’ (SVHC) are used in the manufacture of our products.
